**Mathematics Curriculum:**

This guide attempts to help teachers of American Indian students in grades K-12 provide culturally relevant education that takes place in the regular classroom, includes content related to Indian students' lives, makes students proud, expands to other experiences, and enhances learning. This guide provides teachers with background, materials, and example activities for mathematic units for students in grades K-12. They are aligned with challenging content standards. There are five sections in this book, one for each of the grade levels K-2, 3-5, 6-8, and 9-12 as well as a section for American Indian Mathematics Standards. All of these units have been developed by teachers and others who work with American Indian students.
