Prerequisites for Physician Assistant Program at CSS

If you are applying to the Physician Assistant Program and are wondering if your previous coursework will fulfill any of the prerequisite requirements for the Physician Assistant program please review the information provided in these prerequisite guides for answers to those questions. Courses that fulfill the prerequisite requirements for the Physician Assistant program are noted below for each of the Minnesota State Universities.

Please note that labs are preferred in science related courses, when applicable. All prerequisites must have been completed within 10 years from the year of application. All must be completed before entry into the program. Because prerequisite courses establish the framework for the physician assistant program, all prerequisite courses must be completed at an institution of higher learning. Advanced placement courses taken in high school will not be accepted as meeting the prerequisite requirements for application to the Physician Assistant program.

Additional information regarding applying for admission to the program can be found on The College of St. Scholastica website at go.css.edu/p-a.

Applicants are also advised to review Central Application Service for Physician Assistant (CASPA) application instructions related to The College of St. Scholastica to ensure they meet the current admissions requirements. Applicants must report every college course attempted in the coursework section of the CASPA application, including those courses later repeated for a higher grade. CASPA GPAs include all courses completed with grades and credits, even if they were later repeated for a higher grade.
