

Consortium Agreements

Course credits taken through an approved consortium agreement with another university or qualifying study abroad program, will be integrated into the student's record once the course has been completed. These courses must be approved for transfer, by both the home institution and the host institution, prior to the start of the course. Financial Aid may be available for combined total credits from both schools, but only the home school will administer financial aid. Grades earned from courses taken through a consortium agreement are reflected in the student's cumulative GPA, and are subject to SAP evaluation at the end of the term.
