

Fast Track Application Process: Master of Science in Exercise Physiology

- Who is eligible:** The College of St. Scholastica's seniors enrolled in the undergraduate Exercise Physiology program who, at the time of application, have a minimum cumulative GPA of 2.8 or higher.
- Why:** Current enrolled seniors can bypass aspects of the graduate application process. Faster. Easier. Less Hassle. Since the faculty of the program have already interacted with the students, they are aware of their ability to be successful in the graduate program.

What it entails:

- Applications must be received by **February 15**. This gives both the Office of Graduate Admissions and the EXP department an idea of what the incoming class will look like. Students who submit the application after February 15 would have to go through the entire application process.
- Applicants must have an overall cumulative GPA of 2.8 at the time of application and must be on track to graduate. Verification will be made to ensure that they are on track to graduate. Students who do not have the overall GPA of 2.8 at the time of application will be required to complete the entire application process.
- Applicants will be exempt from writing the essay and submitting the two graduate recommendations.
- If an applicant is accepted, it would be on a provisional basis until conferral of the bachelor's degree.
- Note: Meeting minimal entrance requirements does not necessarily guarantee admission.
