

EndNote Web

(See [EndNote Download](#) for instructions on using that version)

EndNote is software that can organize, store, and input citations into Word documents to help you with your research. The College of St. Scholastica has a site license which offers two options for you to access EndNote and you can either pick one or use both as the situation warrants.

How to Get EndNote

Go to the Library Homepage css.edu/Library

Select *Citation Help* from the tabs at the top.

Library of The College of St. Scholastica: Home

Welcome to the CSS Library. Please contact us if you need assistance.

Next, look in the right column to see information about EndNote. You can get access to EndNote either by signing up for the web version or installing the download version onto your personal computer either for a Windows or Mac computer.

To decide between the two versions, consider these questions:

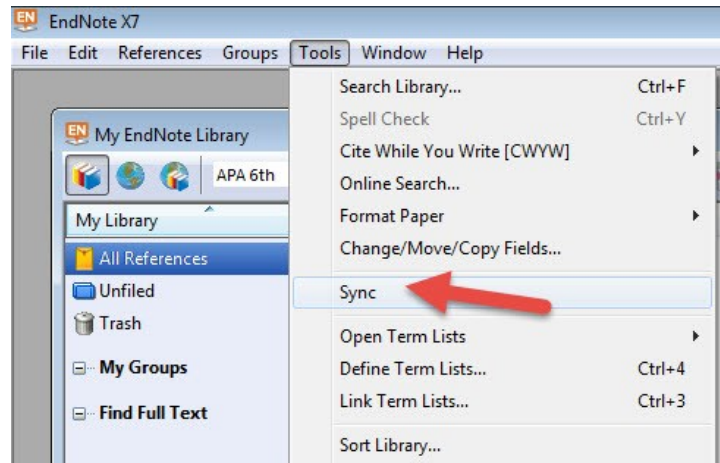

Use EndNote Web if you answer yes to the following questions:

- Do you not want to worry about downloading the software onto your computer?
- Do you want to be able to access EndNote via the web from any computer anywhere?
- Are you just wanting something that can help you correctly format your citations for your paper?

Use EndNote Download if you answer yes to the following questions:

- Are you comfortable downloading the software on to your personal computer?
- Do you want to be able to use EndNote without being connected to the Internet?
- Do you want to use EndNote for a more in-depth, long term project and store and organize your research?

It is also possible to sync your downloaded version of EndNote with your online EndNote Web version. Click on *Tools* in the top tool bar and then *Sync* to set that up.

EndNote

EndNote is software that can organize, store, and input citations into Word documents to help you with your research. The College of St. Scholastica has a site license which offers two options for you to access Endnote and you can either pick one or use both as the situation warrants.

1. EndNote Download

To download EndNote, click on the appropriate computer link below, log in to the Intranet, and click on save. EndNote will then be installed on your computer.

- [Instructions](#)
How to download and set up your EndNote software
- [EndNote Database Instructions](#)
How to export citations from some of the most commonly used databases

2. EndNote Web

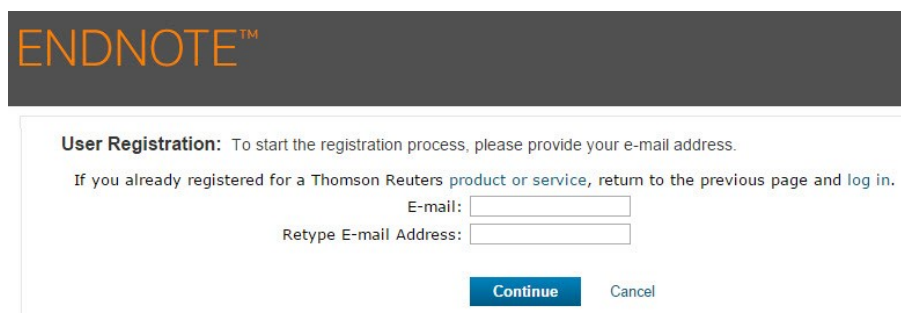

- [Online Registration](#)
NOTE: You must be on the Duluth campus to register for EndNote Web.
- [Instructions](#)
How to register for and use EndNote Web

Once you have decided which version (it is possible to do both), click on the appropriate link for either the Windows or Mac version of EndNote to download or else to create an EndNote web version. Use the username and password you have to access your CSS email, COR, or Blackboard to authenticate and start the download or web process.

Instructions for Signing up for Endnote Web

To set up an EndNote Web account, you must sign up on the Duluth campus. This is because the College is only paying for current students, faculty, and staff to use this software and the only way it can be determined that you are a current member of the community is by signing up here in Duluth. After one year of off campus use, you will be prompted to verify your connection with St. Scholastica by logging in from on campus.

Complete the online form to register:

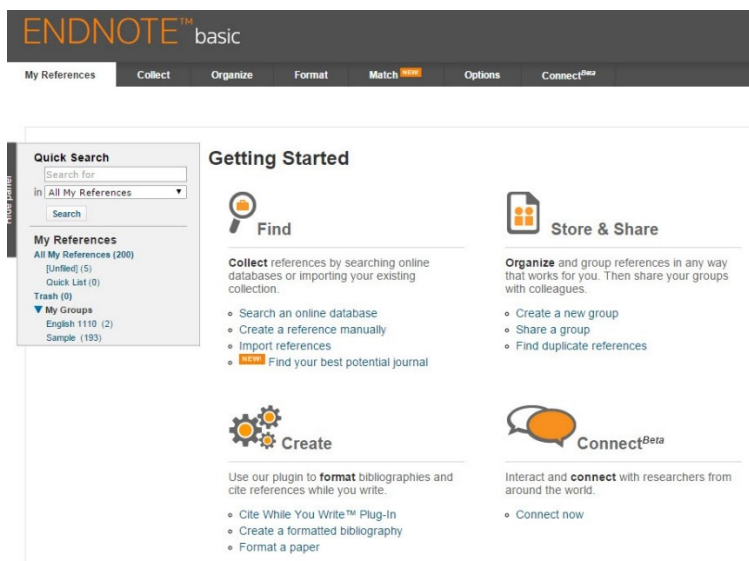

The screenshot shows the 'User Registration' page of EndNote Web. At the top, the 'ENDNOTE™' logo is displayed in orange and white on a dark background. Below the logo, the text reads: 'User Registration: To start the registration process, please provide your e-mail address.' Underneath, there is a line of text: 'If you already registered for a Thomson Reuters product or service, return to the previous page and log in.' The form contains two input fields: 'E-mail:' and 'Retype E-mail Address:'. At the bottom of the form, there are two buttons: a blue 'Continue' button and a grey 'Cancel' button.

After creating an account, you can access EndNote Web from any computer either on or off campus by navigating to www.myendnoteweb.com and logging in.

Using EndNote Web

Entering Your References

Once you log in, you will then get this window. Initially you will need to collect citations that you are using for works cited or references page by either searching online databases, creating a reference manually by typing in the source's information such as the author, title, etc. or import from existing files such as from EndNote download.

The screenshot shows the 'Getting Started' page of EndNote Web. At the top, the 'ENDNOTE™ basic' logo is displayed. Below the logo, there is a navigation bar with the following tabs: 'My References', 'Collect', 'Organize', 'Format', 'Match', 'Options', and 'ConnectBeta'. The main content area is divided into four sections: 'Quick Search', 'My References', 'Find', and 'Store & Share'. The 'Quick Search' section has a search box and a dropdown menu. The 'My References' section shows a list of references: 'All My References (200)', 'EJrefed (5)', 'Quick List (0)', 'Trash (0)', and 'My Groups' (English 1110 (2), Sample (193)). The 'Find' section is titled 'Getting Started' and contains a list of actions: 'Collect references by searching online databases or importing your existing collection.', 'Search an online database', 'Create a reference manually', 'Import references', and 'Find your best potential journal'. The 'Store & Share' section contains a list of actions: 'Organize and group references in any way that works for you. Then share your groups with colleagues.', 'Create a new group', 'Share a group', and 'Find duplicate references'. The 'Create' section contains a list of actions: 'Use our plugin to format bibliographies and cite references while you write.', 'Cite While You Write™ Plug-In', 'Create a formatted bibliography', and 'Format a paper'. The 'ConnectBeta' section contains a list of actions: 'Interact and connect with researchers from around the world.' and 'Connect now'.

Usually you will be entering in your sources' information. Click on *Create a reference manually* and enter the appropriate information into each bibliographic field in this online form.

New Reference

Bibliographic Fields:

Cancel

Reference Type:

Generic

Author:

Use format Last Name, First name. Enter each name on a new line.

Title:

Year:

Secondary Author:

Secondary Title:

Number of Volumes:

Number:

Pages:

Section:

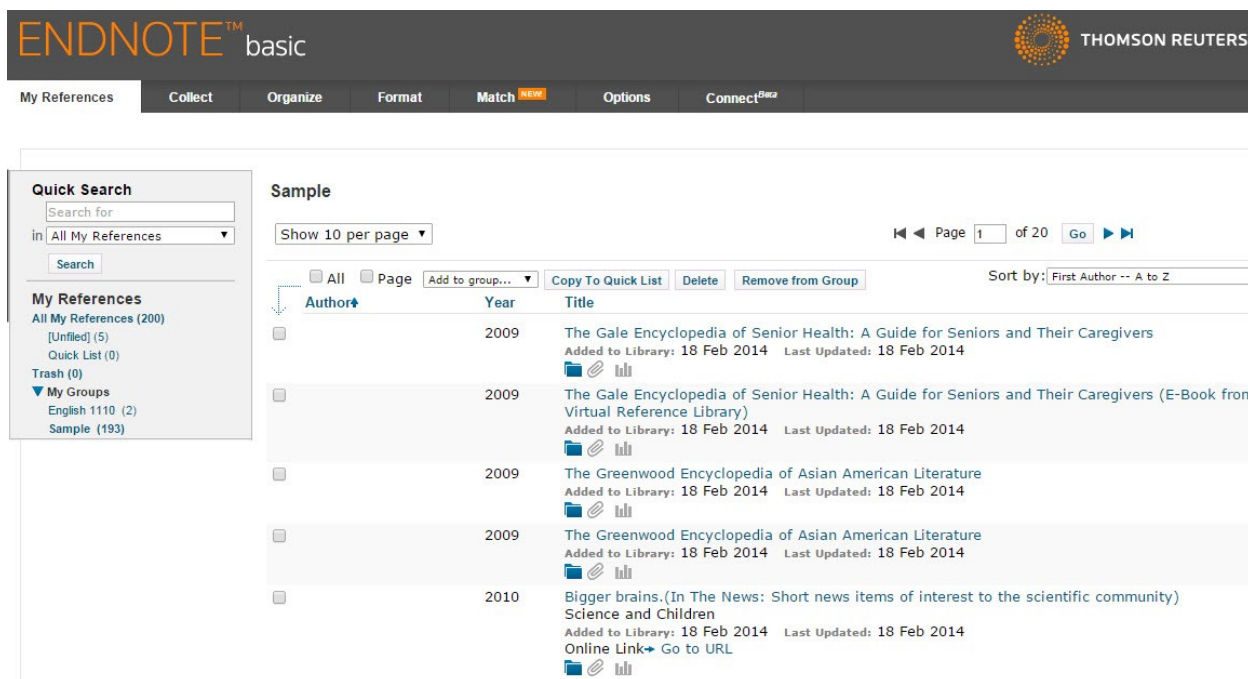

Tertiary Author:

Tertiary Title:

Edition:

Note: The above fields are needed for most bibliographic styles.

Once you have added your references, you can click on the *All My References* link to view them.

The screenshot displays the ENDNOTE basic software interface. At the top, the logo 'ENDNOTE basic' and 'THOMSON REUTERS' are visible. Below the logo is a navigation bar with tabs: 'My References', 'Collect', 'Organize', 'Format', 'Match', 'Options', and 'Connect'. The 'My References' tab is active. On the left side, there is a 'Quick Search' box with a search field and a dropdown menu set to 'All My References'. Below this is a 'My References' sidebar showing 'All My References (200)', 'Trash (0)', and 'My Groups' including 'English 1110 (2)' and 'Sample (193)'. The main area is titled 'Sample' and shows a list of references. The list has columns for 'Author', 'Year', and 'Title'. There are checkboxes in the 'Author' column for each reference. Above the list are buttons for 'Add to group...', 'Copy To Quick List', 'Delete', and 'Remove from Group'. The list contains five entries, including 'The Gale Encyclopedia of Senior Health: A Guide for Seniors and Their Caregivers' and 'The Greenwood Encyclopedia of Asian American Literature'. The bottom of the list shows 'Bigger brains.(In The News: Short news items of interest to the scientific community) Science and Children'.

Filing your References

Click on the boxes in front of the author column on references you need for a particular paper or assignment. There are two ways in which you can file them so you can format them and then print, save, or email them.

You can organize your citations in groups. You may wish to have separate groups for each assignment, class, or research project or just keep all your citations in one group. Click on the boxes in front of the author column on references you wish to move to a folder. Then click on the dropdown arrow after the *Add to group...* field to do those actions.

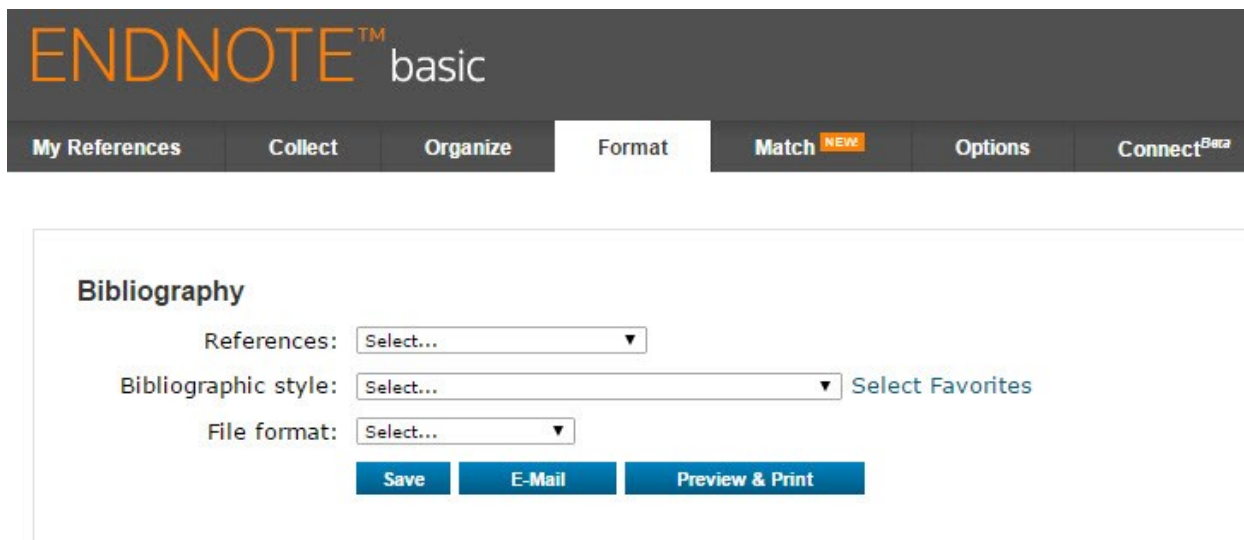

You can also Copy to Quick List by clicking on the boxes in front of the author column and then clicking on the Copy to Quick list button.

For both options, look at the column to the left to select the Quick List or the groups you have created for citations that have been filed.

Formatting Your References

Click on *Format* tab at the top in order to get your references in the right format for your assignment.

Get your references by clicking on the dropdown arrow after *References* and selecting either your Quick List, a group, or all your references – wherever you have filed the references you need for this particular assignment.

Select which citation style you need for your assignment by clicking on the dropdown arrow after *Bibliographic style*. Usually this will either be APA or MLA. Ask your professor if you don't know.

Select the file format you would like your references to be in. The suggested format is HTML as this is most universally accepted.

Next, click on *Save* if you wish to save this to your computer, *E-mail*, or *Preview & Print*. It is suggested to save it to your computer as then you can copy it and put it in your Word document for your assignment.

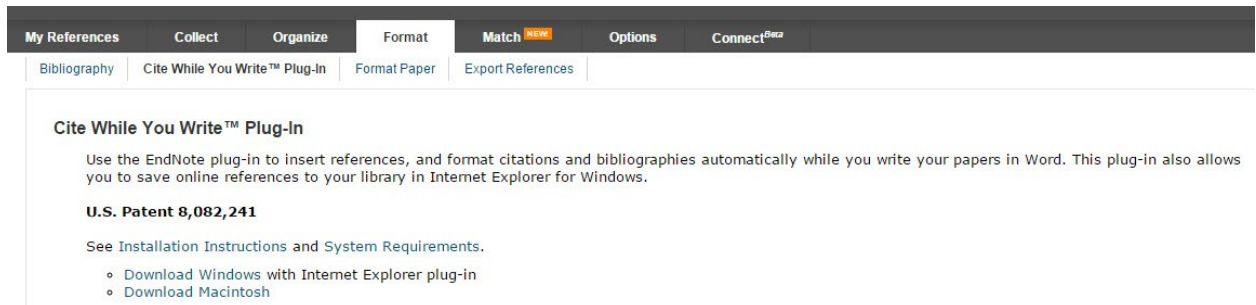

Here is what the HTML file looks like:

From here you can copy it and paste it into Word. Obviously you will have to do some editing to make it correct.

Combining EndNote with Word

It is possible to insert references, and format citations and bibliographies automatically while you write your papers in Word. The plug-in also allows you to save online references to your library in Internet Explorer for Windows. Click on *Format* tab and then the *Cite While You Write Plug-in* link for more instructions.

The screenshot shows the EndNote software interface. At the top, there is a dark navigation bar with several tabs: 'My References', 'Collect', 'Organize', 'Format', 'Match NEW', 'Options', and 'Connect NEW'. Below this bar, there is a sub-menu for the 'Format' tab with options: 'Bibliography', 'Cite While You Write™ Plug-In', 'Format Paper', and 'Export References'. The 'Cite While You Write™ Plug-In' option is selected, and its content is displayed in a white box. The content includes a title 'Cite While You Write™ Plug-In', a paragraph explaining its function, a patent number 'U.S. Patent 8,082,241', and a link to 'See Installation Instructions and System Requirements.' followed by two bullet points: 'Download Windows with Internet Explorer plug-in' and 'Download Macintosh'.

THINGS TO KEEP IN MIND:

EndNote does make mistakes, so you will need to change them. Remember – a computer only matches, it does not think. EndNote still requires you to proofread it. Use the Library's citation LibGuides found on the homepage of the Library's website, published handbooks, or ask a Librarian for more help.
