SOLAR

SOLAR is a database of databases. It searches all our Library resources and even some we don't own. It's a little like the old "feeling lucky" button in Google. But just like Google, or any tool, there is right time to use it. And like Google, the results can be overwhelming. Sometimes using one of our focused, discipline-specific databases can make you luckier.

Click on the dropdown arrow at the end of the *All fields* box to search by author, item title, abstract, or caption.

To string your terms together, click on the drop down arrow at the end of the *and* box. Choose AND, OR, NOT to broaden or narrow your search. NEAR 5, 10 or 25 helps with proximity searching.

AND – narrows searches by combining terms. Citations must have **all** your terms to be included in results list. Ex. Shellfish AND allergy AND precautions.

OR – broadens searches by searching for all terms separately. Citations will have **either** term. Ex. Higher Education OR College

NOT – narrows searches by excluding a portion of a large topic. Citations will have the first term but **NOT** the second term. Ex. Dogs NOT Poodles, Management Styles NOT TQM

You can limit your search by type of article, a date range, language, and within a given discipline or journal.

You can narrow your search by an item type, language, publication date, journal or book title, or journal filter.

Click the *Search* button when you are done constructing your search.
